

Smart Communication Server

SL1000

Affordable, Efficient and IP Enabled Solution

SL1000 - Advanced & Unique Solutions

Unified Messaging

Voice Response System (VRS)[™]

Voice Mail[™]

Loss of message is a loss of opportunity. SL1000 has a powerful Voice Mail solution to eliminate any lost messages, with a choice of either 15 hours or 40-hour recording time. Voice Mail operation and access to the mailbox is easy from the terminal.

Message Notification

When an external caller leaves a voice message at the employee's extension, SL1000 automatically places a call to the pre-assigned number (either extension, mobile phone, home, and send a notification informing they have received a new message.

Conversation Recording

Users may record and store telephone conversations into the users Voice Mail Box and playback the recorded conversations anytime.

Mobility (Dual Forking)

Mobility is the key to success in expanding a business. Mobile phone can be set as the answering terminal when the users are out of the office. No more missing important calls when they are out of office. This is to be done by you for your own Mobile/GSM because like an Internet extension. This feature is recommended for sales office, business persons who are frequently out of office. Also, used for factory and warehouse having wide workspace.

Office / Home Guard

Auto Warning Message

Use the terminal set as a recorder. Messages or conversations can be recorded and played back automatically on a periodic schedule over the keylogger's built-in speaker to simulate human presence in the surroundings.

Alarm Sensor Support

An Alarm Sensor Support is already built-in. Warn intruders when there is a forced break-in and have protection against vandalism. Connect the Alarm Sensor (PIR) or motion detectors to the SL1000 and take advantage of the built-in alarm system. A pre-recorded warning message can be played back through the built-in speaker of the telephone or a speaker speaker as an option. Register the PIR sensor. NOTE: This is not a security system. Consult your local police or a local police for all details on the specifications.

Green Initiative and Ecology System

NEC has always been the first to embrace technological innovation, many of which are industry environmental pioneer. Our green initiative are supported by the ISO 14001 Eco-Design program, which is designed to ensure that all products are designed and manufactured to be eco-friendly. We are committed to the effective application of an environmental management system for our users. ISO 14001 (2004) requirements. We are reducing our carbon footprint and supporting social responsibility. We are supporting the environment and the user's health and safety. We are supporting the environment and the user's health and safety. We are supporting the environment and the user's health and safety. We are supporting the environment and the user's health and safety.

Office Communication in a Box

SL1000 - Benefits

AFFORDABILITY

Handy and Useful Functions

SL1000 is equipped with rich built-in functions that improve the employee communication environment, contributing to saving in Total Cost of Ownership.

Hybrid Concept

SL1000 provides hybrid ports, realizing seamless integration of multiple terminals, single line telephones, faxlines, and more without complex wiring.

Scalable Architecture

SL1000 starts from 4 trunk lines and extensions, scales up to 512 extensions (DSS ports). The system is flexible to suit any changing demands of communication infrastructure.

EFFICIENCY

Productive Communication

Increase efficiency by fully utilizing system features such as Conference, Automated Attendant, Call Forwarding and more, for a productive office communication environment.

Web-based Manager

The terminal and system settings are easily customized to suit the user's preference.

Unique Features

Office / Home Guard functions are provided. Also, the Mobile Extension feature provides "Mobility".

IP Telephony

IP-Enabled

SL1000 is ready with the capability of VoIP (Voice over IP) trunk or to possibly change in the future for both SIP and standard SIP (Session Initiation Protocol) trunks and extensions.

Feature Rich IP Terminal

SL1000 provides 24-way IP terminal, having the same usage as a multiple terminal in the office IP environment. And this IP terminal can be located out of office as a Remote Extension.

ECOLOGY

Lower Power Consumption

SL1000 uses less power consumption than most legacy systems. It is approximately 25% lower than previous models, and reduces the total cost of ownership by minimizing the office electricity expense, at the same time saving the environment by going green.

Power Saving Mode

SL1000 allows automatic standby mode during office closing hours. This feature saves the system's energy when it is not in use, and increases the overall performance.

SL1000 - Built-In Features

- Built-in Voice Messaging**
Increase productivity of handling incoming calls by Built-in Auto-Answering function. SL1000 is initially built-in with an Auto-Answering feature without additional hardware, and is able to record up to a greeting message for the users. It also keeps up to 10 messages to be recorded from mailbox.
- Caller-ID**
Identify who has been contacting your office by Caller-ID feature. SL1000 can store the Caller-ID trunk from Telex, and the information can be displayed on all types of terminals. In addition, incoming ring tone can be set against specified Caller-ID numbers, allowing identification by ring tone.
- Group Listening**
Group Listening function allows you to broadcast your conversations via built-in speaker on the multiline terminal. This enables your surrounding parties to listen to the conversation.
- Conference**
Join a conference without even leaving the desk. This feature allows you to set up a teleconference between internal and/or external parties. Maximum 15 participants per group, total 32 participants (unlimited) Remote Conference is also available when internal and/or external parties can access to virtual conference room with awareness.
- Hotline**
Ideal feature for reception, security guard hours, parking attendants, and etc. Set up the terminal for dedicated use. This function allows you to call a pre-assigned extension or external number by just lifting the handset without dialing any numbers.
- Day / Night Mode**
Employees can control Day/Night mode for incoming calls after working hours and at the same time control outgoing calls after working hours. SL1000 provides up to 8 system modes which can be switched either automatically or manually. Each mode can internal and/or external parties can access to virtual conference room with awareness.
- Call Forwarding**
No more hassle for the customers to be reaching an employee who's out of their desk. Call Forwarding feature enables incoming calls to be redirected automatically to another extension or an external number (mobile phone, home and etc.).
- Doorphone Connectivity**
SL1000 provides proprietary doorphone terminal connections at the front door. Additionally, mobility is in the office, then there is an option that the doorphone ring can be forwarded to your mobile phones.
- Talk Restriction**
Talk Restriction feature prohibits specified extensions from accessing unauthorized numbers which have been pre-programmed into the restriction table. A total of 15 restriction classes can be assigned to each extension.
- Extension Lock (Dial Block)**
Extension Lock (Dial Block) feature prevents unauthorized personnel from making calls from your extension while you are away from your desk. Feature can be enabled on or off by entering a security code.
- Long Conversation Alarm / Call-off**
Manage the length of the conversation to cut down communication cost and increase efficiency of employees. This alarm feature provides call-in keeping time periodically to remind them. The call-off feature can be used to disconnect external calls forcefully after the pre-programmed time limit.
- Web-based System Management**
Administration of the system has never been easier with the intuitive Graphical User Interface GUI. Your own PC can be connected to SL1000 to let you edit/advance/manage various terminal settings.
